

Life-Saving Products

Brush Wellman products are vital in many life savings applications and other highly critical components in industries such as medical, telecommunications, automotive, aerospace, and defense. Its products are in high demand to meet today's driving technological advancements, where, in many cases, there are no substitute products. Some of these life saving and critical applications include:

- Cell phones
- Computers, connectors and chip sockets
- Automotive air bags, ignitions and switches
- Medical laser bores
- Mammography and x-ray components
- Fire sprinkler heads
- Weather satellites
- Missile guidance systems
- Weapons and defense system components
- Oil and gas exploration components
- Mold tooling and plastics manufacturing
